

Getting Started

The Imaging Source FireWire Cameras

Quick start

- First of all, connect the camera and the computer
- Only then install the **WDM Stream Class driver**
- Install **IC Capture TIS**
- Install **IC Imaging Control TIS**

Starting with a checklist

The material you need

- PC or Laptop with PIII/800 MHz/256 MB or higher
- IEEE 1394 interface which complies with OHCI (such as the PCI/1394o1 or the CBI/1394-1)
- Cable to connect this 1394 interface to the camera (such as the CA/1394-64/x or the CA/1394-66/x)
- In case of a laptop the camera may require a power supply unit
- A C or CS-mount lens

Please make sure that you have

- setup Windows 2000/SP4 or Windows XP/SP2
- a graphics card with 24 or 32 bit
- setup DirectX 9.0c or higher
- setup an IEEE 1394 interface, which complies with OHCI (as the PCI/1394o1 or the CBI/1394-1)
- connected the camera to this interface

Software

Important: When you first connect the camera to your PC's IEEE 1394 interface, Microsoft Windows automatically installs a generic driver. This driver must not be used. Instead, please follow these steps to install The Imaging Source driver:

- Please insert the included CD and click
 - (1) **Driver** in this first dialog
 - (2) **Install** in the following table (row "WDM Stream Class driver", column "The Imaging Source cameras")
- Start again with the CDs first dialog and click
 - (1) **Software for end users** in this first dialog
 - (2) **IC Capture** in the second dialog
 - (3) **Install IC Capture TIS** in the third dialog

For programmers only:

- Start again with the CDs first dialog and click
 - (1) **Software for programmers** in this first dialog
 - (2) **IC Imaging Control** (.NET component, ActiveX, C++ Class Library) in the second dialog
 - (3) **Install IC Imaging Control TIS** in the third dialog
