

# GETTING STARTED

## USB AND FIREWIRE CAMERAS

### QUICK START

- First of all, connect the camera and the computer
- Only then install the **Driver**
- Install **IC Capture**
- Install **IC Imaging Control®**

### STARTING WITH A CHECKLIST

#### THE MATERIAL YOU NEED

- PC or Laptop with Pentium processor (Dual-Core recommended)
- IEEE 1394 or USB 2.0 interface
- Cable to connect the camera to this interface
- In case of a laptop, a FireWire camera may require a power supply unit
- A C or CS-mount lens

#### PLEASE MAKE SURE THAT YOU HAVE

- setup Windows XP/SP2 or Windows Vista (32 or 64 bit)
- setup DirectX 9.0c or higher
- setup an IEEE 1394 or USB 2.0 interface
- connected the camera to this interface

#### SOFTWARE

Important: When you first connect the camera to your PC's IEEE 1394 or USB 2.0 interface, Microsoft Windows automatically installs a generic driver. This driver must not be used. Instead, please follow these steps to install The Imaging Source driver:

- Please insert the included CD and click
  - (1) **English** in the first dialog, **Software installation** in the second dialog and **Driver** in the third dialog
  - (2) Please install the driver that corresponds to your camera
- Start again with the dialog **Software installation** and click
  - (1) **Software for end users** and **IC Capture**
  - (2) Please install **IC Capture** (you will find the serial number on the CD sleeve)

For programmers only:

- Start again with the dialog **Software installation** and click
  - (1) **Software for programmers** and **IC Imaging Control®** (.NET component, ActiveX, C++ Class Library)
  - (2) Please install **IC Imaging Control®** (you will find the serial number on the CD sleeve)
